Information

Using Somfy motors and control (ILT4), the Multiformat screens utilise 2 working rollers (one for the screen material, and one for a black masking material), to allow customisable screen ratios. The rollers can be programmed independently allowing full customisation of the ratios. 8 memories can be stored onto the included IR remote, alternatively, RS232 control is possible.

Options

Customisable sizes:

The case and material size can be customised to the nearest 1cm with a maximum size of 325cm wide. Price based on the next size up, i.e. pricing for a screen 280cm wide, would be based on the 300cm screen.

Screen Material Options:

- Reference White: 1.0 gain, colour neutral
 - Diverse Grey: 0.9 gain
- Standard White: 1.2 gain (with or without black back)
 - Acoustic Transparent – 1.0 gain

Pricing
